Detailed Action

Response to Amendment

Claims 1-2, 4-6, and 8-21 are pending. This action is in response to the amendment received March 30, 2006.

Response to Arguments

The rejection of claims 1-2, 4-6, and 8-21 under 35 U.S.C. 102(e) as being unpatentable over Hillmer et al. (US 6,714,918) is maintained.

Applicant's arguments filed March 30, 2006 have been fully considered but they are not persuasive.

In response to the arguments concerning the previously rejected claims the following comments are made:

A.) In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., identifiers would aggregate the transactions of a thief who spreads out transactions among several anonymous stored value accounts) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

B.) Applicant alleges that the prior art made of record fails to teach the step of recognizing a common load source account to associate the transactions. The examiner disagrees with applicant's representative since Hillmer teaches the step of

Art Unit: 3624

recognizing a common load source account to associate the transactions (col. 4, lines 38-51; col. 5, lines 3-38; col. 6, lines 21-36). In other words, Hillmer discloses a common transaction being verify for the same customer. He teaches the fraud detection system provides a result or signal to the order processing system signifying whether or not the analyzed transaction parameters indicate that the transaction is likely fraudulent. The transaction is also checked to see if the value of the commodities being purchased is greater than a pre-determined threshold amount. A vendor may determine that transactions whose total value is less a particular threshold are less likely to be fraudulent.

With regards to the claims rejected as taught by Hillmer, the examiner would like to point out that the reference teaches the claimed limitations and thus provides adequate support for the claimed limitations. Therefore, the examiner maintains that Hillmer taught the claimed limitations.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
